

ZANO Smart City

Solar energy

Eco friendly

Wi-Fi hotspot

Induction charger

Bluetooth speaker/
built in memory

Quick charge USB

Induction loop

LED light

PHOTON

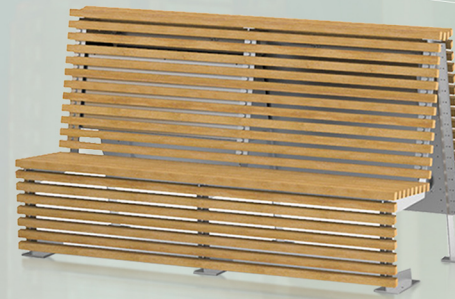

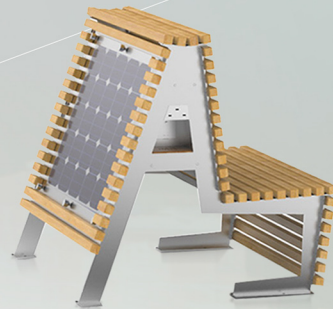

solar bench

ZANO Smart City, a product line comprising solar powered facilities such as charging stations or smart benches.

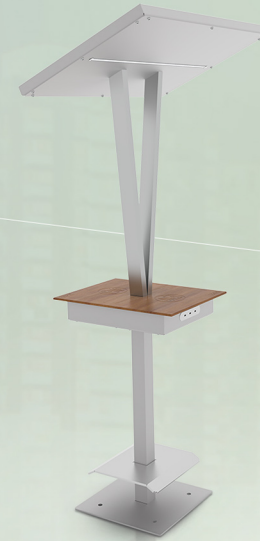

UNIVERSE
Solar station

FLASH
Solar bench

SUNFLOWER
Solar station

PHOTON
Solar bench

We offer products that are part of a bigger line of street furniture (**Universe, Flash, Photon**) as well as individual units (the **Sunflower** solar station).

PHOTON smart solar bench variants

Photon 02.409
solar bench

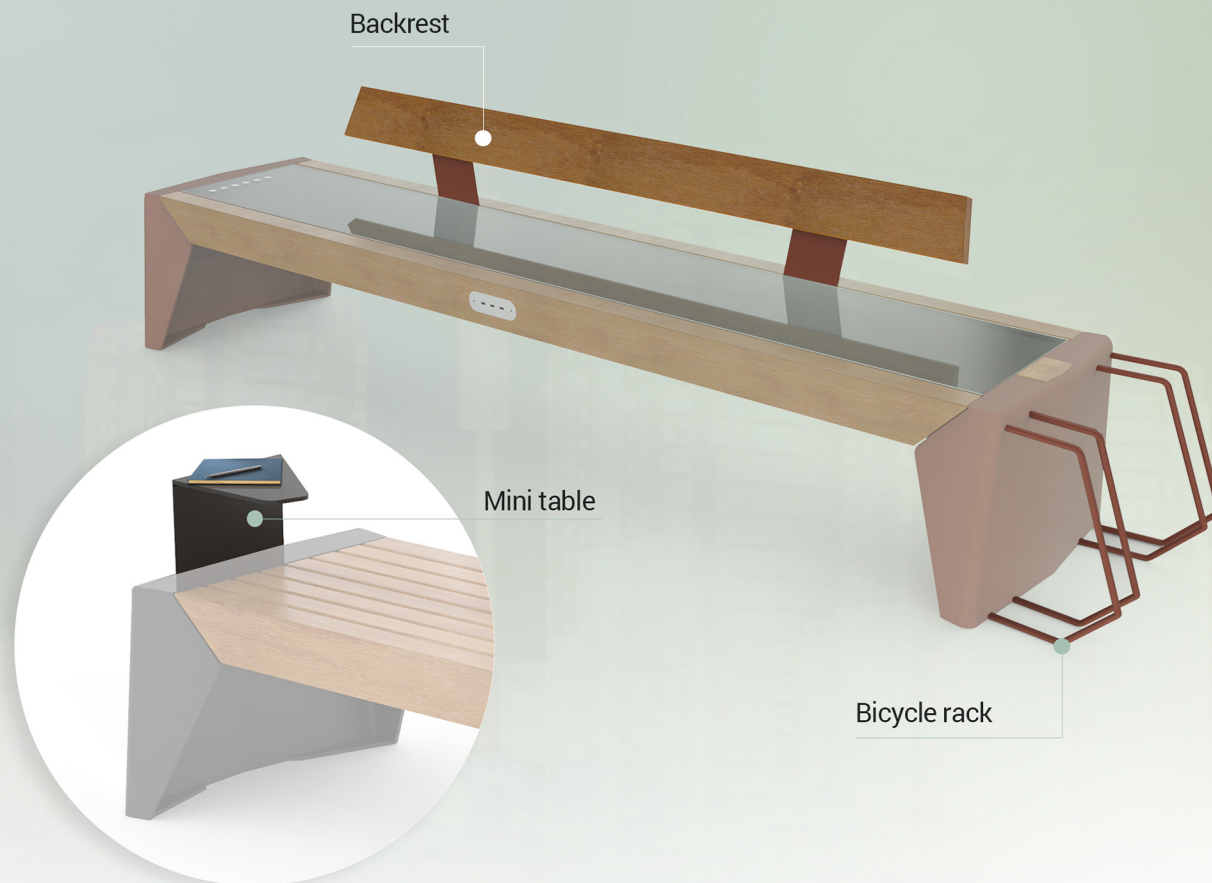

Photon 02.409.2
standard bench (connected to the power grid)

Photon 02.409.1
standard bench

Additional options

For models 02.409 and 02.409.2 there is a choice of **additional functions**:

-  Induction loop for hearing aid users
-  Induction charger
-  Wi-Fi hotspot with a fast internet connection
-  Bluetooth speaker/built in memory

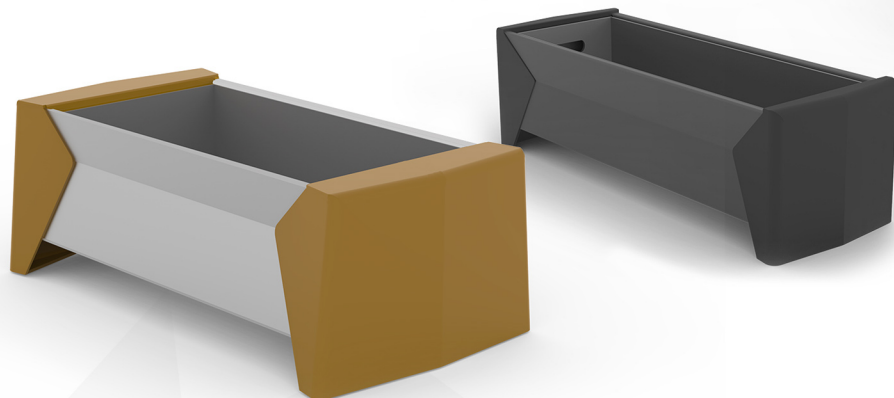

Photon litter and recycling bins

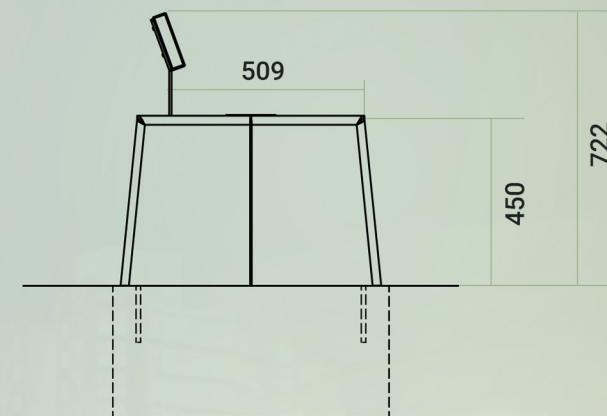

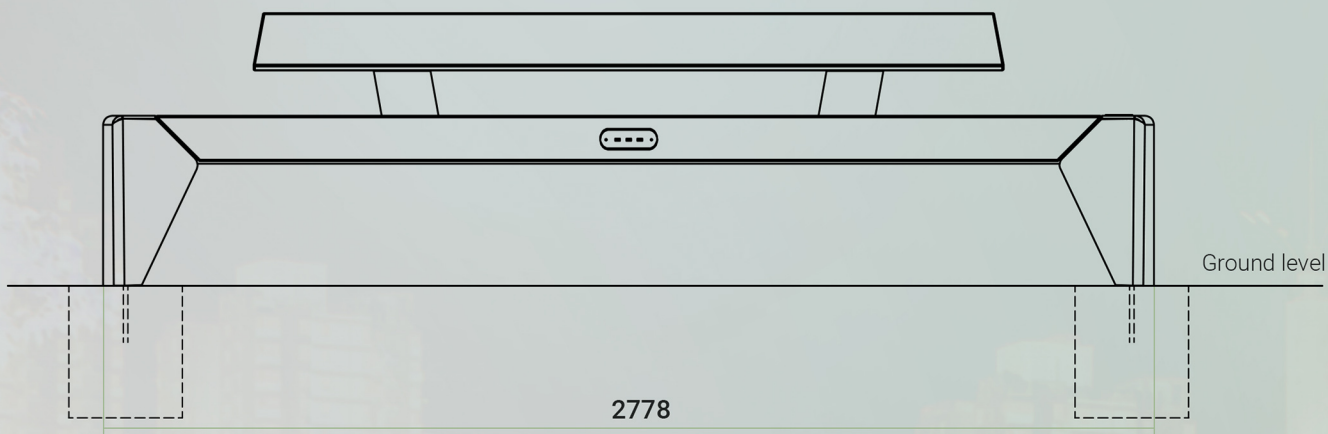

Photon planters

Size L
06.009.L

Size M
06.009.M

THE PHOTON PRODUCT LINE consists of solar and standard benches, litter bins, recycling bins and planters.

Dimensions in milimeters

Materials:

steel: carbon or stainless
wood: standard, exotic

Technical specification:

photovoltaic panels output power (STC): 100 W
batteries capacity: 36 Ah
operating temperature range: -20°C - 60°C
weight: 205 kg

Standard equipment:

3 USB quick charge ports
ambient light
air cooling system

Additional equipment:

induction charger
bluetooth speaker/speaker with built in memory
audio induction loop
Wi-Fi hotspot

As a leading manufacturer in Poland we always do our best to meet the customer's requirements. ZANO is equally comfortable and experienced in designing for different types of street furniture projects. We are passionate about creating beautiful, functional, sustainable models. This is achieved through a process of focused listening that seeks to truly understand and respond to the inherent nuances of each particular client.
