

GENERAL TECHNICAL DATA

dimensions:

- width: 166 cm
- total depth: 107 cm
- base depth: 40 cm
- height: 245 cm
- height of higher table: 105 cm
- height of lower table: 85 cm

weight:

- 354 kg (with softwood)
- 362 kg (with hardwood – exotic)

planter capacity: - 154 L

materials:

- European softwood or exotic hardwood
- stainless steel or carbon steel

technical specification:

- photovoltaic panel power (under STC conditions): 200 W
- photovoltaic panel technology: monocrystalline

equipment:

- 200 W photovoltaic panel
- LED lighting
- battery charge indicator
- 2 × USB-A Quick Charge 3.0 ports
- 2 × USB-C Quick Charge 3.0 ports

optional equipment: - built-in Wi-Fi module

DESCRIPTION

The structure of the solar station is made of welded carbon steel (S235JR), galvanized and powder-coated according to the RAL palette, with stainless steel functional panels and a 2 mm thick trellis mesh with clamps for climbing plants. Optionally, the entire station can be made of brushed stainless steel (1.4301). The base of the station consists of pylons and a planter made of 2 mm thick steel sheet.

On both sides of the structure, tables are attached, made of 5 mm thick steel sheets combined with wooden tabletops. The tabletops are made of wooden boards measuring 1559 × 80 × 38 mm (five boards on the sitting-height table and three boards on the standing-height table). The wood is either European softwood, impregnated and double-varnished, or exotic hardwood, impregnated and double-oiled.

All elements of the street furniture must be properly anchored in accordance with the manufacturer's technical instructions. The manufacturer accepts no responsibility for any damage caused by negligent use or failure to comply with the instructions.
