DESCRIPTION

The Pavo recycling bin is a 4-segment version of the popular city bin. By developing the waste bin to 4 chambers, we meet the latest requirements of the waste segregation policy. Each chamber is designated for: paper and cardboard, metals and plastics, glass, bio-waste and mixed waste.

The basic version of the litter bin is made of stainless steel and exotic wood. It is possible to order the waste bin in carbon steel, galvanized and powder coated, and in spruce or pine wood (domestic woods are varnished). Wood can be replaced by HPL laminate.
