

OPTIONS

Construction:

- concrete

Seat and backrest:

- carbon steel (s235Jr)

Methods of installation:

- free-standing

DESCRIPTION

One of the most popular materials used in manufacturing small urban architecture is **stainless steel**. It is a durable and elegant material used in our highest quality products. However, recently **architectural concrete** is gaining more popularity. That material is extremely durable as well and esthetic at the same time. It combines classic simplicity and modern minimalism. We used **architectonical concrete** also in other ZANO products: trigono bench and concrete sitting. In our recent project we created an **urban chair with a base made of architectonical concrete**. Classic raw and cold concrete is softened by 8 mm thin stainless steel backrests and armrests. Painted with our RAL palette colours, they may get an elegant touch with dark shades or a modern urban style with light colours that will light up your neighbourhood. The C BLOCK urban concrete chair is perfect for business centres and urban spaces surrounded by concrete buildings. Thanks to our new projects, the time you spend outside will become a completely new experience. Get comfortable in our C BLOCK urban concrete chair and enjoy the urban spirit.

GENERAL TECHNICAL DATA

Dimensions:

- width: 49 cm
- length: 70 cm
- height: 86 cm

Weight:

- 160 kg

Materials:

- carbon steel
- architectural concrete
